

Student Initiated (SI) Project Proposal

Name of Student:	Nazrin Ally Bin Mohammad Nadhar Ally			Admin No.:	2402459H
School:	☐ ASC ☐ BUS ☒ IIT ☐ DES ☐ ENG ☐ HSS	Current Year of Study:	☐ 1.1 ☐ 1.2 ☒ 2.1 ☐ 2.2 ☐ 3.1 ☐ 3.2	Diploma:	Applied AI
Project Category:	☐ Entrepreneurship & Innovation ☐ Health & Fitness ☐ Sustainable Development ☐ Arts ☐ Language ☐ Cultural ☐ Social Issues ☐ Technology & Science ☐ Media Creation ☒ Others			If you have chosen others, please specify:	Game Development
Project/Competition Name:	N.A.				
Personalised Project Title:	2D Rouge-like Casual Game				
Target beneficiary/beneficiaries (if applicable):	For casual gamers who like rouge-like 2D games				
My Learning Goals	Get started on learning the game creation process from the planning to making the game itself Broaden my horizons by learning game creation engines like Unity Improve time management by following checkpoints throughout the game making process				
What is my project about?	What am I going to do? (50 words) Create a 2D wave defence type game where the players has to go through swarms of enemies with each wave getting progressively harder by introducing different types of enemies which the player has to defeat to clear the wave. The player will receive upgrades during each waves, the upgrades and enemies will always be randomized to promote replayability and to ensure each run is unique How am I going to do it? (100 words)				

Guided Learning GTPI302

	Firstly I would map out a timeline to plan out what I must do such as character models, game mechanics, music assets and other related processes so I can visualize what needs to be done. After that, I would look at YouTube tutorials or free online courses to learn how to use the game engine. Breaking up parts of my games into smaller portions will help me focus and make it easier for me to code it.
What will I show as evidence of my learning in my project portfolio?	<i>E.g. Report, prototype, checklist, glossary of terms, reflection, draft designs, surveys, survey analyses, interview transcripts, etc. (50-100 words).</i>
	I will include the prototype of the game as well as a short video demo of not only the game but also the code that runs it. This will also include a report on the codes, a reflection of what ive learnt and any drafts of the game ive made.
What else would I like to say about my project?	Share how this project is important or meaningful to you personally. <i>E.g. I have never done marketing before. Now I have a product which I would like to market. I really hope to pick up some useful skills and ideas on how to market my product and get opportunity to meet some industry expert to mentor me.</i>
	Ive always been a fan of wave defence games, this could be a good learning experience for me not only to broaden my horizons in technical skills but also the process on how game developers plan out and make their games. I feel that this skill could be intergraded in everyday studies and help me plan out better.
